

## Franzosini Award

The Franzosini Award was established by the former Solubility Data Commission (V.8), in 1988, during its 14<sup>th</sup> annual meeting held in Guildford, Surrey, United Kingdom, in conjunction with the third International Symposium on Solubility Phenomena (ISSP) that was hosted by A.F. Danil de Namor. The “Paolo Franzosini Endowment Fund” was created in 1988 under the proposal of A. S. Kertes, from the generous donation of Franzosini’s wife and daughter after the sudden death, on the 24<sup>th</sup> January 1985, of Paolo Franzosini, Professor of Physical Chemistry at the University of Pavia (Italy) while completing the volume 33 of the Solubility Data Series on *Molten Alkali Metal Alkanoates*. The volume, finished with the help of his colleagues, Paolo Ferloni, Alberto Schiraldi and Giorgio Spinolo, was published in 1988 by Pergamon Press. The family generously offered all fees and honoraria associated with the volume for the establishment of the Franzosini Fund. A simple trust fund was established by Anders Björkman (then treasurer of IUPAC), and approved by the IUPAC Bureau as well as by the Commission on Solubility Data (IUPAC Commission V.8) chaired by John Lorimer. Under the terms of the trust the capital is held by IUPAC, the accounting is done by the IUPAC secretariat, and the income derived from the Fund is used exclusively for the activities of the Commission on Solubility Data of the Analytical Chemistry Division; the Chair of the Commission decides the precise use of the money.

The Solubility Data Commission established the Franzosini Award to be given to assist a promising young contributor to the Solubility Data Project to attend, in even years, the ISSP meetings, and in odd years the annual meeting of the Solubility Data

Commission. Between 1989 and 2016 there have been twenty two the recipients of this prize often leading to new collaborations many of which are still active in preparation of volumes of the Solubility Data Series. During the SSED meeting of 2008 it was decided that a maximum of two prizes could be given only in the even years, when the SSED meeting and the ISSP meet together.
